## General information about puppies from Ulvsholm Kennels

### Price

The price of a puppy from our 2017 litter will be DKK 15.000 (2000 EUR approximately).

### Time of sale

Puppies are ready for delivery at 10 weeks of age.

### Reservation

A reservation of a dog/puppy for collection at a later time is valid when a deposit of 10 % of price of the dog has been made. This amount is part of the price and is set off against the full purchase price when the sale is closed.

Customers having made a reservation for a puppy from a litter have the choice of their puppy in the order, in which they have paid their deposit. The receipt for the deposit states which number of choice the customer has within the selected sex among the puppies, which are left when the breeder has selected puppies for herself.

The selection process starts, when the puppies are old enough for the breeder and buyers to have a fair chance of assessing the puppies, usually at 8 weeks of age.

The deposit is not refunded by cancellation of the purchase unless such conditions arise, that make the breeder unable to offer a normal and healthy puppy of the selected sex.

### Vaccination

Puppies get their 1st vaccination (against Distemper and Parvo Virus) before delivery.
